Roadless Area Conservation

National Forest System Lands in Idaho

Final Environmental Impact Statement

Volume 2: Appendices A-S (except C)

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

Appendix A—Comparison of the Idaho Roadless Area Boundaries with past Inventoried Roadless Area Boundaries

Introduction

A concerted effort has been made to use the best available inventoried roadless area boundaries for the analysis in this EIS. Since the 2001 Roadless Rule was released, forests have continued to refine roadless area boundaries as part of the forest plan revision process. Moreover, where forests have not completed their forest plan revision process there are differences in boundaries.

The purpose of this appendix is to disclose differences between the Idaho Roadless Areas analyzed in this EIS and the inventoried roadless areas used in the 2001 Roadless Rule (table A-1). Also, where there were differences between forest plan inventoried roadless areas and the Idaho Roadless Areas, those differences are disclosed (table A-2).

Not all national forests are on an equal footing in terms of having up-to-date inventoried roadless areas in a GIS format. For this reason, there are some roadless areas where past development has occurred and where roads exist. This is a factor in considering the quality of the roadless characteristics present.

Some sources of differences in Idaho Roadless Area boundaries include:

1. Inventoried roadless area boundary lines may be misrepresented when newer information for roads or improvements are overlaid. For example, if roads have been identified using a global positioning system (GPS), this information is more accurate than a line drawn on a map. A boundary line should obviously follow a road and not go across it; therefore, there would be a need to adjust the boundary.
2. Inventoried roadless area boundary lines may be misrepresented because they were developed at a different scale than the roads layer. This may cause the boundary line to weave on one side of a road to another, whereas in reality the boundary should be just on one side; therefore, there would be a need to reconcile the boundary.
3. In some cases, there are just errors. Roads or improvements such as facilities may have been included in the boundary when they should not have been.

Maps depicting the differences between the Idaho Roadless Rule and 2001 Roadless Rule boundaries, and the Idaho Roadless Rule and Existing Plan boundaries may be found in the map packet.

Understanding the Tables

The following coding structure was designed to simplify the explanation of differences in roadless area boundaries between Idaho Roadless Areas and inventoried roadless areas used in the 2001 Roadless Rule (table A-1). The same coding scheme is used to explain differences between Idaho Roadless Areas and inventoried roadless areas used in Existing Plans (table A-2). This appendix shows the acreage of the inventoried roadless areas corresponding to the analysis and shows any increases or decreases in acreage.

There is also a column with a code representing the reason for the change. In a few cases more than one code is provided to explain differences. When a number is entered into the reason column, it signifies a footnote to be found at the end of the table.

The 2001 Roadless Rule did not include designated wild and scenic rivers in the roadless area acreages. They have been included in the Idaho Roadless Area boundaries.

Reasons for Increases

U = additional unroaded acres adjacent to an inventoried roadless area, typically reflects planned developments that were never implemented.

R = Recovery or restoration of a previously developed area.

Reasons for Decreases

D = development, including road construction, timber harvest, mining or other developments reducing roadless characteristics.

General Codes, Can Be Used For Increases Or Decreases

M = used when there are multiple reasons.

G = change caused by improved mapping technology or a boundary moved to a manageable location on the landscape.

L = roadless acres acquired or lost through a land trade.

E = corrected error.

S = forest plan special area.

Table A-1: Idaho Roadless Areas Compared With 2001 Inventoried Roadless Areas

Forest	New roadless name	2007 (acres)	2001 Roadless Rule (acres)	Difference (acres)	Reason
Boise	Bald Mountain	6,236	6,236	0

Note: The 2001 Roadless Rule Final EIS shows 9,322,000 acres; however, there was a 36,984-acre mistake on the Salmon National Forest, for Squaw Creek. At some point during the final EIS, a part of the Sawtooth Recreation Area (not even roadless) was merged into the Squaw Creek Roadless Area.

¹ – Land exchange acres left out of 2001 Rule (included a wilderness study area).

² – Included the Kootenai National Forest acres in Idaho.

³ – Acres mistakenly labeled Buckhorn Ridge Roadless Area during the 2001 Roadless Rule process

⁴ - This area was split from Little Slate Creek.

⁵ – This area was removed from the inventory during the Forest Plan Revision process as a consequence of development.

Table A-2.: Idaho Roadless Areas compared with existing Plan Inventoried Roadless Areas

Forest	New roadless name	2007 (acres)	Forest plan (acres)	Difference (acres)	Reason
Caribou	Bear Creek	20,967	21,048	-81	G
Caribou	Bonneville Peak	32,262	32,167	95	G
Caribou	Caribou City	81,534	79,102	2,432	G
Caribou	Clarkston Mountain	15,512	15,520	-8	G
Caribou	Deep Creek	7,099	7,089	10	G
Caribou	Dry Ridge	23,478	23,307	171	G
Caribou	Elkhorn Mountain	41,805	41,977	-172	E
